INDIRECT HYDROHEXA

Indirect HydroHexa

1. General Description

HydroHexa is used to prepare the domestic hot water and balancing at the primary side. It can work for extended period of time without accumulation of calcification because the heat exchanger is able to remain cold by itself. HydroHexa has proportional hydraulic controller to get the maximum efficiency and has the priority of generating hot water. It provides low return temperatures at the primary side. It is suitable for usage with condensing boilers. Material of heat exchanger and pipes are stainless steel and HIU can work efficiently in conjunction with aluminum radiators.

HydroHexa have differential pressure valve, hydraulic controller and zone valve that are working together towards obtaining perfect balance in the system. It is used in buildings with central heating system to prepare domestic hot water and individualizing the heating feature for each user. It acts as a pressure breaker in tall buildings therefore eliminating the requirement for a zoning area. It circulates the heat in to a closed loop by using a secondary heating exchanger right next to the domestic hot water exchanger.

Features

- Self-acting hydraulic and thermostatic controls
- Stainless steel Hex and pipes
- Instantaneous response to DHW demand
- Suitable for low supply temperatures
- Integrated differential pressure valve
- Temperature controlled Keep-Warm Function

2.1 Component List

- | | |
|---|---------------------------------------|
| 01 — SH Heat Exchanger | 11 — Expansion Tank |
| 02 — EPP Insulation of SH Heat Exchanger | 12 — Safety Valve |
| 03 — DHW Heat Exchanger | 14 — Cold Water Supply Strainer |
| 04 — EPP Insulation of DHW Heat Exchanger | 15 — Thermal By-pass Valve |
| 05 — SH Control Valve | 16 — District Heating Supply Strainer |
| 06 — DHW Control Valve | 17 — Insulation Shut-Off Valve |
| 07 — Heat Meter | 18 — Junction Box |
| 08 — DP Balancing Valve | 19 — Zone Valve with Thermal Actuator |
| 09 — Circulation Pump | 20 — DP Balancing Valve |
| 10 — Water Hammer Arrester | 21 — Hydraulic Proportional Regulator |

3. Technical Specifications

Description	Data
Nominal primary supply temperature	80°C
Maximum primary supply temperature	85°C
Minimum primary supply temperature	55°C *
Nominal DHW supply temperature	55°C
DHW Set Range	45°C to 60°C
Return Temp Limit Range	35°C to 65°C
CH Limit Range	30°C to 80°C
Primary connections	Female / 18mm
Mains & DHW connections	Female / 18mm
Central heating connections	Female / 18mm
Pressure relief	15mm
Maximal primary differential pressure	600 kPa
Pressure class DH circuit	PN16
Pressure class CH circuit (3 bar safety valve)	PN10
Pressure class DHW circuit	PN10
SH Maximum working pressure	2.5 Bar
Casing width***	555 mm
Casing height***	718 mm
Casing depth***	275 mm
Casing Material	Metal case with Insulation
Weight	32kg **
Electrical supply info	230V 50Hz
Fuse ratings	3 Amp

* Minimum required DH supply temperature is DHW setpoint + 5°C with a minimum of 55°C.

** Unit weight may vary depending on the optional components built into the unit.

*** Dimensions are given without Cabinet
